

WEINHEIM – Powering Progress, Building Futures

Leading the Oil and Gas Industry with Unmatched Quality,
Innovation, and Reliability!

Welcome to WEINHEIM

Welcome to WEINHEIM, a stand-out name in the oil and gas sector, delivering supreme quality to its customers. We redefine excellence by optimizing costs for our clients and adhering to rigorous schedules. What sets us apart is our commitment to reducing customer expenses, saving time, and fulfilling the local sector's needs. These factors define the operational philosophy behind our brand.

WEINHEIM TECH, an Iraqi Kurdish company, stands at the forefront of technological innovation and comprehensive management services, catering to the dynamic demand of the oil and gas industry in Kurdistan and Iraq.

About WEINHEIM

At WEINHEIM, we are proud to be more than just a service provider for our clients; we are their partner in progress. Our core strengths lie in our technical expertise, teamwork, and a deep commitment to safety and environmental responsibility. You will always find us offering our clients the best value and service.

Located in the heart of Erbil, at Italian Village 1, office no. 645, our headquarters serves as the central hub for our operations. From here, we manage a wide range of services, being the leading oil and gas service provider in the region. We can be your chemical solutions provider as we are also an exclusive distributor of Chimec SpA. Other services we offer are chemical decontamination, manufacturing, maintenance, and retubing of heat exchangers, fin fan coolers, and other related equipment.

We can also manufacture, maintain, and clean oil storage tanks. It does not end there; we supply oil field tools and chemical and mechanical cleaning assistance. You can also trust us with fire fighting systems, installation and welding, painting and grit blasting, and all the work related to pipelines. We have a dedicated and highly skilled team that works tirelessly to exceed customer expectations.

Our Journey

WEINHEIM has been on a constant journey of growth and innovation since its inception. What began as a small venture has evolved into the most notable service provider in the oil and gas sector. Our journey is marked by significant milestones, including securing key contracts with prominent clients like Kar Group and Qaiwan Group.

We have continually expanded our service offerings and developed state-of-the-art workshops for retubing and maintenance of the equipment. WEINHEIM is also registered with the AVL system of the Ministry of Natural Resources, Kurdistan Regional Government (MNR-KRG).

Vision Statement

Our vision is to achieve industry excellence and emerge as a globally respected leader. We strive to be a sustainable and profitable company that delivers outstanding value to our customers, business partners, and employees.

Through the power of technology, chemistry, and our dedicated team, we aim to provide superior products and services that set new standards in the industry.

Mission Statement

Our mission is to surpass our customers' expectations by providing high-quality, innovative, and comprehensive management services driven by technology. We aim to swiftly adapt to the evolving chemical and technological needs of our clients, emphasizing technical expertise, teamwork, safety, and environmental responsibility. By prioritizing these values, we strive to deliver exceptional service and sustainable solutions that drive profitability and community care.

Target Audience

Our primary clientele includes refineries, oil fields, and industrial projects. We specialize in providing tailored chemical solutions, Manufacturing, maintenance, and re-tubing of different equipment and storage tank services to international oil companies operating in the region.

Target Region

WEINHEIM's operations are intensely focused on the Kurdistan Region and Iraq, areas that are rapidly becoming known as the "Oil Exploration Capital of the World." Our strategic location allows us to effectively serve these escalating markets, ensuring timely and efficient service delivery.

Services We Offer

Manufacturing Of Heat Exchangers & Fin Fan Coolers

WEINHEIM excels in the custom manufacturing of heat exchangers and fin fan coolers tailored to your specific needs. Our manufacturing process is driven by cutting-edge technology and a commitment to quality. Our skilled engineers design and fabricate these critical components to meet the highest industry standards. From material selection to final assembly, every step is monitored to ensure durability and efficiency. Trust us to deliver robust solutions that enhance your performance.

Maintenance And Retubing Of Heat Exchangers, Fin Fan Coolers, And Related Equipment

Our expert team at WEINHEIM specializes in the maintenance and retubing of heat exchangers, fin fan coolers, and related equipment. Utilizing state-of-the-art technology and industry best practices, we ensure your equipment operates at peak efficiency. Our process involves thorough inspections, precise retubing, and rigorous testing to guarantee optimal performance and longevity. We understand the critical role these components play in the oil and gas industry, and our skilled technicians are dedicated to minimizing downtime and maximizing productivity.

Complete Manufacturing, Maintenance, And Cleaning Of Storage Tanks

We offer comprehensive services for storage tanks that include manufacturing, maintenance, and cleaning. Our team is equipped with the expertise to construct storage tanks that are operational and built to last longer. We start with the design and create a blueprint that fits your requirements. You can also hire us for ongoing maintenance to prevent corrosion and structural issues. It will ensure that your tank remains in optimal condition. Our cleaning services utilize advanced techniques to remove contaminants and maintain the integrity of your storage solutions.

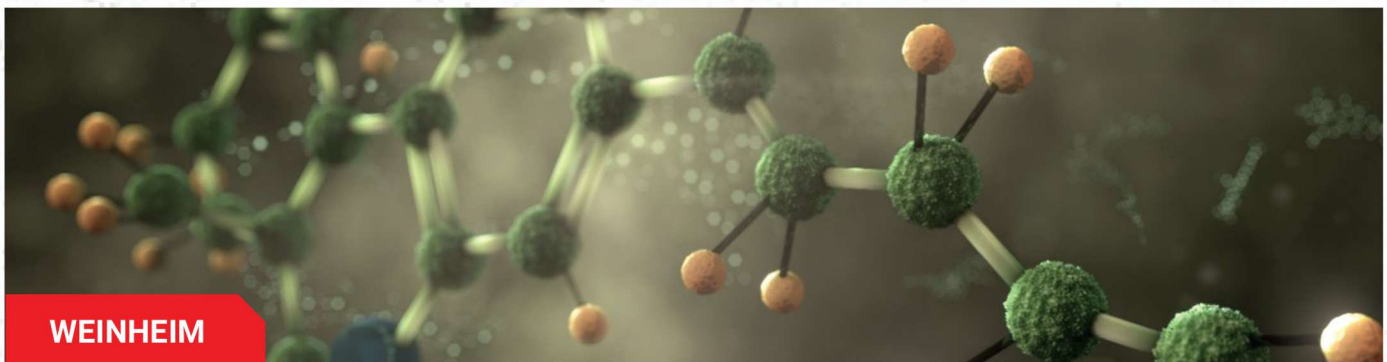

Pipelines (Supply Of Pipes, Welding, & Insulation)

At our firm, we promise complete pipeline solutions, including the supply of high-quality pipes, expert welding services, and effective insulation. Our experienced team ensures that every pipeline project is executed with precision and adherence to safety standards. We source durable pipes and employ skilled welders to create secure connections that withstand the demands of oil and gas industry. Our insulation services further enhance pipeline efficiency by maintaining optimal temperature control and reducing energy loss.

Chemical Solutions Provider – Exclusive Distributor Of Chimec SpA

We offer a wide range of advanced chemical solutions tailored to the oil and gas industry. We have chemical products for all purposes and for different budget requirements. From corrosion inhibitors to emulsifiers, biocides, drilling fluids, and more, we have speciality chemicals for various applications. Our team of experts works closely with clients to identify the best chemical solutions for their specific needs, ensuring enhanced performance and cost-effectiveness. We are also the exclusive distributor of Chimec SpA and some other leading producers of performance chemicals.

Chemical Decontamination

Our chemical decontamination services are designed to safely and effectively remove hazardous substances from equipment and facilities. Using advanced chemical agents and proven methodologies, our skilled team ensures thorough decontamination, minimizing downtime and restoring operational safety. We adhere to strict environmental and safety standards, providing peace of mind and maintaining the integrity of your assets. Trust WEINHEIM to handle decontamination with precision and care. We promise complete recovery and restoration from decontamination.

Chemical & Mechanical Cleaning

Our clients get thorough chemical and mechanical cleaning services to maintain the efficiency and safety of their equipment. Our chemical cleaning process involves using specialized agents to dissolve and remove contaminants, while our mechanical cleaning uses physical methods to scrape and blast away deposits. Our experienced team ensures that all cleaning procedures are performed safely and effectively, reducing downtime and extending the lifespan of your equipment. Trust WEINHEIM for comprehensive cleaning solutions that keep your operations running smoothly.

Painting & Grit Blasting

Our painting and grit blasting services are essential for maintaining the durability and appearance of your equipment and structures. Our team uses the latest techniques to prepare surfaces through grit blasting and removing rust, scale, and old paint. This is followed by professional painting that provides a protective coating, enhancing longevity and resistance to environmental factors. Our meticulous process ensures a high-quality finish that prolongs the life of your assets.

Supply Of Oil Field Tools and all types of valves

Our inventory includes everything that you need, and our knowledgeable team assists clients in selecting the right tools for their specific needs, ensuring optimal functionality and safety. With WEINHEIM, you get access to top-tier oil field tools that support your operational excellence. We do not compromise on quality at all.

Fire Fighting Systems

Our services include the design, installation, and maintenance of modern fire suppression systems that protect your assets and personnel. We use high-quality materials and advanced technologies to create reliable fire fighting solutions that provide critical protection in emergency situations. Our experts ensure that each system is compliant with industry regulations and can stay operational for a very long time. There is precise engineering involved in this production. We have a skilled workforce that can professionally handle these projects.

Projects Completed & Our Current Clients:

Kar Group

Kar Erbil Refinery

EPC Contract for Tank Construction (Foundation, Fabrication, and Installation)

End-to-end tank construction services, ensuring strong foundations, precise fabrication, and seamless installation.

Manufacturing and Retubing of Heat Exchangers and Fin Fan Coolers

High-quality retubing services to maintain heat exchangers and coolers, ensuring optimal performance.

Supply of Chemical Solutions for All Units of Kar Refinery

More than 3 years of providing essential chemical solutions to ensure efficient refinery operations.

Pipe Welding for the Fire Fighting System

Skilled welding services to ensure the reliability and safety of firefighting systems.

Khurmala Field

Tank Fabrication at Kar Khurmala

Expert fabrication services for storage tanks, ensuring they meet industry standards.

CPS1- Pump Station Maintenance and Construction Contract:

Masking, Cleaning, Grid Blasting, and Painting of Pumps

Comprehensive maintenance of four pumps, including cleaning and painting, ensures smooth operation.

Cleaning and Painting of Valves

Detailed cleaning and painting of valves to maintain their functionality.

Construction Works for Valve Background

Structural enhancements around valves to support their long-term use.

Khurmala Electric Power Plant Maintenance Contract:

Removal and Reassembly of Internal Floating Roofs

We expertly dismantle and reassemble internal floating roofs to ensure they function optimally.

Cleaning, Gritting, and Painting of Inside Tanks

Our team cleans, grits, and paints the interiors of five tanks, enhancing their durability and performance.

New Drain Pipe Works

Installation of new drain pipes to improve efficiency and prevent blockages.

Qawian Group – Bezhan Refinery

Manufacturing and Retubing of Heat Exchangers and Fin Fan Coolers

We do manufacture heat exchangers and fin fan coolers. As far as maintenance is concerned, we worked for more than 30 exchangers and supplied new bundles. The retubing services made sure that the client received peak performance.
